

OnDemand PowerPerformance Manager™

Cost and service line management made ready and simple

Cost Accounting

Service Line
Development

Detailed DRG
Cost Analysis

Reconciliation &
Auditing

Executive level decisions on cost, revenue, and actual vs. budget performance can be made in real time from virtually anywhere with OnDemand PowerPerformance Manager. OnDemand PowerPerformance Manager provides the fast track to visualize and manage your organization's detailed costs, revenues, and budget variance in order to drive enterprise accountability - all critical to achieving and sustaining financial stability. PowerHealth OnDemand® delivers a complete on demand performance management solution through an intuitive and interactive platform that can be implemented within weeks - not months or years, in order for you to achieve goals in less time, with absolute control.

Cost Accounting

OnDemand PowerPerformance Manager's general ledger and patient cost allocation module empowers analysts with a sophisticated and easy-to-use application for structuring the cost accounting process. The solution includes an embedded reconciliation and audit reports present accurate and consistent results. Each process is reconciled back to the original GL using mainstream and easy-to-use technology. Prior to executing the cost allocation rules, errors are automatically displayed thus reducing FTE time in the overall process.

The patient cost allocation is intuitive to implement and maintain, and uses hospital-wide standard costing rules or exceptions. Whether costing at a procedure level (such as X-ray) or a more summarized perspective (such as RCC), costing can be reported for by patient, DRG, service line, or any desired level of detail. Your organization can analyze cost overruns by investigating patient cost information down to length-of-stay, department, DRG, or to the various cost components which comprise the total cost.

The solution also easily links any external data to your patient episodes for full cost impact analysis in order to assess performance and profitability. OnDemand PowerPerformance Manager is your accurate source for information that can be quickly implemented within weeks and maintains customized or standard cost accounting methodologies.

Benefits

- No software, No IT, and No long-term contracts
- Minimizes overhead to finance personnel and is proven to scale to any size facility
- Accelerates end-of-month reporting and processing of costing results
- Defines hospital-wide costing rules and exceptions to insure accurate and consistent results
- Validates account mapping for discrepancies

- Achieves reporting accuracy through access to greater level of detail down to individual activity or consolidated levels
- Performs linkage to external data for profitability and performance analysis
- Uses DRG weights to allocate costs for non-patient areas
- Supports multiple RVU's

Revenue Management

OnDemand PowerPerformance Manager's revenue modeling allows your organization to analyze payer contracts and manage their performance. The solution is fully integrated with the cost data so that users can perform payer profitability analysis for either existing or proposed contract terms. Using the decision rules engine, users can select pre-defined terms or can customize terms to meet specific needs. Contract terms are applied to patients and resulting reports guide you to better manage your revenue potential. Virtually any selection criteria from your patient database can be used to analyze payer performance.

Benefits

- Supports profitability analysis by payer, by timeframe, or by service line
- Aligns contractual terms with patient data
- Models existing or proposed contract terms with a flexible and intuitive business rules engine
- Reduces or eliminates IT overhead

With OnDemand PowerPerformance Manager, you gain:
