Executive level decisions can now be made in real-time - from virtually anywhere - with PowerHealth OnDemand®'s Financial Performance Analytics. OnDemand Financial Performance Analytics provides the fast track to visualizing your service lines for profit and loss, physician and administrative utilization, reducing costs and driving accountability - all critical to achieving and sustaining financial stability. OnDemand delivers performance management availability 24/7 through our intuitive and interactive analytics platform that can be implemented in days - not months or years, in order for you to achieve goals in less time, with absolute control.

Beyond reporting, OnDemand's Guided Intelligence™ provides organized answers you need for true performance improvement

PowerHealth OnDemand®'s unique Guided Intelligence™ effectively streamlines data and information processes for executives, management and analysts that will help turn this data into actionable intelligence throughout your enterprise. Guided Intelligence™ utilizes predictive analytics to aggregate data from disparate sources and then provides answers you need to achieve breakthrough performance throughout your operations.

Intelligence leads to measurable improvements

Using OnDemand Financial Performance Analytics, your hospital gains greater visibility into financial performance drivers and comparative benchmarks. The end result is breakthrough in utilization efforts, reductions in patient length of stay, and on demand analysis required to support pay-for-performance initiatives. Our solid platform and innovative tools help you uncover key performance variances, isolate root causes, and provide solutions to capitalize on opportunities for improvement.

With OnDemand Financial Performance Analytics, you gain:

- Enterprise service line and contribution margin analysis to track profitability across all departments and services for both inpatient and outpatient including cost, revenues, billing, and much more
- Visual interpretations of performance management through dynamic dashboards, intuitive analysis grids, and access to ultimate detail
- Immediate visibility to monitor key operational business events for tracking, optimization, and resolution
- User self-service and automated reporting and access from virtually anywhere to significantly reduce costs
